About me

Aspiring software developer with a strong interest in building efficient and scalable systems. I began programming in Python in 2022 and have since expanded into full-stack development and small tools through self-driven projects. I enjoy designing solutions that prioritize performance

Education

BS	Addis Ababa University , Engineering Dropped out because of heart problems	4Kilo, 5Kilo 2020 – 2021
BS	Unity University , Computer Science Ongoing	Gerji 2023 – 2027
Skill	Ethiocoders , Computer Science Finished all courses provided	Remote Sept 2024 – Dec 2024

Projects

Proton Store Stock Tracker An internal inventory tracker tool for a medium sized sports focused retail store - Closely working with the client for improvements - Currently migrating backend from PHP to Node.js and frontend to React	Mar 2026 – present
RC4 and Rabbit Ciphers Desktop application implementing stream ciphers for text and file encryption - Developed complete implementations of RC4 and Rabbit algorithms in Java - Built a graphical user interface for encryption/decryption workflows	Apr 2026 – May 2026
Amharic Character Recognition AI Machine learning model for recognizing Amharic characters as a class assignment - Character level model with TensorFlow - High accuracy on controlled datasets (the right font)	Jan 2025 – Jan 2025

Skills

Languages, proficient in: C++, Java, Python, (Java | Type)Script, PHP
Languages, familiar with: Lua, Node.js, Next.js, Prolog,
Technologies: MySQL, PostgreSQL, GIT, Linux
Frameworks: Laravel, React, Nextjs, Bootstrap
ML Frameworks: TensorFlow
Others: Data Structures and Algorithms
